PROJECT BACKGROUND

The U.S. Army Corps of Engineers is assisting the Honolulu Board of Water Supply with an inventory of watershed data and land uses. These various land uses within the watershed have the potential to impact ground and surface water quality and quantity in the Central Oʻahu area.

The Central O'ahu area encompasses all of the streams that flow into Pearl Harbor, as well as all of the 'Ewa District.

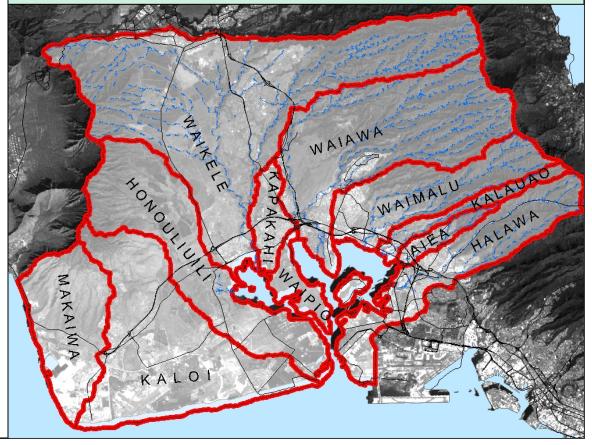

Central O'ahu Issues:

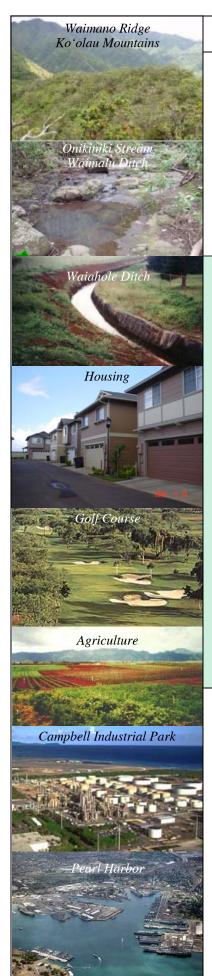

- Variety of water resources: streams, bays, estuaries, wetlands and aquifers
- Variety of land uses: residential, commercial, industrial, resort, preservation, and agriculture
- Fastest growth rate on O'ahu

Project Goals:

- Inventory existing watershed data and information
- Identify water resource issues and concerns.
- Describe potential preventive and remedial actions to protect and restore the ecosystem of Central O'ahu.

Federal Project Authority: Planning Assistance to States Program, Section 22 of the Water Resources Development Act of 1974

PROJECT BACKGROUND

Plan Area: Central O'ahu drainage area, including the Waikele

watershed to Pearl Harbor, from Hālawa to

Makaīwa watersheds

District Size: 110,257 acres; approximately 287,900 people

Watersheds: Hālawa, 'Aiea, Kalauao, Waimalu, Waiawa,

Kapakahi, Waipi'o, Waikele, Honouliuli, Kalo'i,

Makaīwa
